## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of the invention of species 5, claims 1 – 25 in the reply filed on April 19, 2005 is acknowledged.

### ***Drawings***

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 100, 101, 102, 110, 113, 201, 202, 204, 300, 302, 303, 701, 702 and 703. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

3. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly

Art Unit: 2811

those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

4. The abstract of the disclosure is objected to because the final three lines refers to purported merits of the invention. Correction is required. See MPEP § 608.01(b).

#### ***Claim Objections***

5. Claims 1 – 25 are objected to because of the following informalities: in line 5 of claim 1, --the-- or --said-- should be inserted between “to” and “LC”. Appropriate correction is required.

#### ***Allowable Subject Matter***

6. Claims 1 – 25 will be allowed upon overcoming the above objection.
7. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach, alone or in combination, a TVS, including “the TVS p-n junction diode element being placed in series with opposite polarity to LC PIN diode.

Art Unit: 2811

**Conclusion**

8. This application is in condition for allowance except for the following formal matters:

The matters noted above, as well as cancellation of the non-elected claims.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
